

Sustainability Policy Innovative Adhesives, LLC

Our Vision

To produce the highest quality products in an environmentally conscious manner.

Our Sustainability Principles

Our approach to business is centered around the environment and social awareness in a manner that sustains economic growth. We do this through the procurement and manufacture of goods using recycled products and contributing our physical and human resources to help local charitable organizations.

Our goals over the next 18 months are to change our packaging materials to utilize 100% recycled material.

We understand that there are limitations but we strive to do our part to help maintain a healthy and striving environment.

Our Commitment

We will publish on our website and when warranted on our packaging our degree of sustainability with our products. To include markings showing the use of environmentally favorable products.
